

CYCLOPS VIEWER

in DRD NanoBlast96

The unique patent-pending DRD design is mind-boggling in intrinsic mechanical simplicity but cannot initially be visualized by even the finest non-Vulcan mind. An extra 97th see-through acrylic site has therefore been added at the very front so that you can at all times see exactly what the 96 sets of operating rods and cylinders are doing. The rods and cylinders are all polished steel and the red and blue are used here for graphic clarity.
